Outlook 2010 Opening in Safe Mode

If you find that Outlook 2010 now opens only in safe mode, it may be because you installed update KB3114409, which was released on December 8, 2015.

Microsoft released a new update on December 16, 2015, that includes the fix for Outlook 2010 launching in safe mode.

Use this link to install the new update: December 16, 2015, update for Outlook 2010 (KB3114560).
